

# Boldly Leading Breckenridge

## Breckenridge Downtown Revitalization Project

### OVERVIEW

The Purpose of the CDBG Downtown Revitalization Project is to address the inadequate and deteriorated pedestrian infrastructure in the downtown area. The project consists of reconstructing approximately eight hundred and eighty linear feet (880 LF) of concrete sidewalks, seven hundred linear feet (700 LF) of curb and gutter, twelve (12) sidewalk ramps, pavement repair, and all associated appurtenances.

The environmental review is currently in process, and design of the project is underway. The City hopes to begin construction sometime in the second quarter of 2024.

### PROJECT DETAILS
